

## REVIEWS

1. Stereochemistry of 1,2-Asymmetric Induction. S. Yamada, K. Koga, *Kagaku*, **1968**, 23, 24.
2. Asymmetric Induction Through Hydride Reductions. S. Yamada, K. Koga, *Selective Organic Transformations*, **1970**, 1, 1.
3. Macrocyclic Polyethers. Application to Organic Reactions. K. Koga, *Yuki Gosei Kagaku Kyokaishi*, **1975**, 33, 163.
4. Organic Synthesis with Optically Active Compounds. Synthesis of Biologically Active Natural Products from Optically Active Amino Acids. S. Yamada, K. Koga, *Yuki Gosei Kagaku Kyokaishi*, **1975**, 33, 535.
5. Crown Compounds. T. Matsui, K. Koga, *Farumashia*, **1976**, 12, 297.
6. Approaches to the Biogenetic-Type Asymmetric Synthesis of Some Amaryllidaceae Alkaloids. K. Tomioka, K. Shimizu, S. Yamada, K. Koga, *Heterocycles*, **1977**, 254.
7. Chemistries of Crown Ethers. Syntheses of Chiral Crown Ethers. K. Koga, *Kagaku, Zokan*, **1978**, 74, 85.
8. Asymmetric Recognition. K. Odashima, K. Koga, In *Host-Guest Chemistry*. T. Osa, ed., Kyoritsu Shuppan, 1979, Chapter 4.
9. Recent Progress in Asymmetric Synthesis. I. An Asymmetric Alkylation of Carbonyl Compounds. K. Tomioka, K. Koga, *Kagaku No Ryoiki*, **1980**, 34, 369.
10. Recent Progress in Asymmetric Synthesis. II. An Asymmetric Addition Reaction to Carbonyl Compounds. K. Tomioka, K. Koga, *Kagaku No Ryoiki*, **1980**, 34, 762.
11. Recent Progress in Asymmetric Synthesis. III. An Asymmetric Additions to Carbon-Carbon Double Bonds. K. Tomioka, K. Koga, *Kagaku No Ryoiki*, **1980**, 34, 920.
12. Highly Selective Asymmetric Alkylation. K. Koga, *Kagaku Zokan*, **1981**, 91, 169.
13. Total Synthesis of Steganacin. K. Tomioka, K. Koga, *Kagaku*, **1981**, 36, 496.
14. Ion Recognitions by the Use of Crown Compounds. S. Sasaki, K. Koga, *Kagaku*, **1981**, 36, 875.
15. Asymmetric Synthesis via Michael Addition Reaction. K. Koga, K. Tomioka, *Kagaku Zokan*, **1982**, 97, 33.
16. Host-Guest Phenomena in Organic Chemistry. K. Odashima, K. Koga, *Kagaku to Kogyo*, **1982**, 35, 300.
17. Cyclophanes. Application as Artificial Synthetic Host Compounds. K. Odashima, K. Koga, *Kagaku*, **1982**, 37, 396.
18. Cyclophanes in Host-Guest Chemistry. K. Odashima, K. Koga, *Organic Chemistry*, **1983**, 45 (Cyclophanes), Vol. 2, 629.

19. Nuncatalytic Additions to  $\alpha,\beta$ -Unsaturated Carbonyl Compounds. K. Tomioka, K. Koga, *Asymmetric Synth.*, **1983**, 2, 201.
20. Synthesis of Dodecahedrane. M. Tanaka, K. Koga, *Kagaku*, **1983**, 38, 293.
21. Asymmetric Synthesis. K. Koga, *Gekkan Yakujii*, **1984**, 26, 71.
22. Total Synthesis of Cytotoxic Neolignans, Megaphone. K. Kawasaki, K. Koga, *Kagaku*, **1984**, 39, 566.
23. Synthetic Organic Compounds with Host Functionality. K. Odashima, K. Koga, In *Host-Guest Chemistry*. M. Hiraoka ed., Kodansha, 1984, Chapter 4.
24. Host-Guest Interactions in Organic Synthesis. M. Shionoya, K. Koga, *Kagaku Sosetsu*, **1985**, 47, 156.
25. New Stereoselective Alkylation of Ester Enolate. K. Kawasaki, K. Tomioka, K. Koga, *Kagaku*, **1985**, 40, 542.
26. Allylic Strain Concept and Designing for Stereoselective Reactions. Conformational Fixation Without Chelation. K. Kawasaki, K. Tomioka, K. Koga, *Kagaku*, **1986**, 41, 361.
27. Approach to Molecular Recognition by Molecules. Design of Clathrate Compounds of Cyclophanes. K. Koga, *Farumashia*, **1986**, 22, 21.
28. Asymmetric Control in the Construction of Quaternary Carbon Centers and Its Application to the Total Synthesis of Natural Products. K. Tomioka, K. Koga, *Yuki Gosei Kagaku Kyokaishi*, **1986**, 44, 545.
29. Asymmetric Deprotonation with Chiral Lithium Amides. R. Shirai, K. Koga, *Kagaku*, **1986**, 41, 546.
30. Asymmetric Oxidation with Osmium Tetroxide. M. Nakajima, K. Tomioka, K. Koga, *Kagaku*, **1987**, 42, 422.
31. Synthesis and Utilization of Heteromacrocycles. S. Sasaki, K. Koga, *Yuki Gosei Kagaku Kyokaishi*, **1987**, 45, 571.
32. Asymmetric Michael Reaction Using Chiral Enamine. K. Tomioka, K. Koga, *Kagaku*, **1988**, 43, 548.
33. Asymmetric Oxidation of Olefins with Osmium Tetroxide. M. Nakajima, K. Tomioka, K. Koga, *Yuki Gosei Kagaku Kyokaishi*, **1989**, 47, 878.
34. Development and Application of Totally Artificial Host Compounds with Molecular Recognition Function. K. Koga, K. Odashima, S. Sasaki, In *Fundamentals and Applications of Inclusion Compounds*. F. Toda, ed., NTS, 1989, Chapter 6.
35. Crown Ethers and Cryptands, S. Sasaki, K. Koga, *Yuki Gosei Kagaku Kyokaishi* **1989**, 47, 493.
36. Synthesis of New Antitumor Agents. K. Tomioka, K. Koga, *Kagaku*, **1989**, 44, 554.
37. Conjugate Addition Reaction to Naphthalene Rings. Development of an Asymmetric Reaction. M.

- Shindo, K. Tomioka, K. Koga, *Kagaku*, **1990**, *45*, 578.
38. Enantioselective Reactions Using Chiral Lithium Amides. K. Koga, *Yuki Gosei Kagaku Kyokaiishi*, **1990**, *48*, 463.
39. Formation and Application of Inclusion Complexes with Cyclophanes. K. Koga, *Kagaku Zokan*, **1990**, *118*, 133.
40. Supramolecular Chemistry. K. Koga, *Kagaku*, **1990**, *45*, 618.
41. Asymmetric Alkylation Using Chiral Bases. M. Murakata, K. Koga, *Kagaku*, **1991**, *46*, 506.
42. Aggregation and Reactivity of Chiral Lithium Dialkylamide Having Chelate Structure. H. Kawasaki, K. Koga, *Kagaku*, **1992**, *47*, 502.
43. Asymmetric Protonation Using Chiral Bases. T. Yasukata, K. Koga, *Kagaku*, **1993**, *48*, 506.
44. Asymmetric Synthesis Mediated by Chiral Ligands. K. Koga, *Pure and Applied Chemistry*, **1994**, *66*, 1487.
45. Enantioselective Reactions Using Chiral Lithium Amides. K. Koga, *Stereocontrolled Organic Synthesis*, **1994**, 97.
46. Approaches to Catalytic Asymmetric Formation and Reactions of Lithium Enolates. K. Koga, M. Shindo, *Yuki Gosei Kagaku Kyokaiishi*, **1995**, *53*, 1021.
47. Enantioselective Asymmetric Synthesis Using Chiral Bases. K. Koga, *New Methods in Drug Research*, **1995**, *4* 25.
48. Molecular Recognition by Membrane Potential Change in Host-Guest Formation. K. Odashima, K. Koga, *Kagaku*, **1995**, *50*, 124.
49. Cyclophanes and Related Synthetic Hosts for Recognition and Discrimination of Nonpolar Structures in Aqueous Solutions and at Membrane Surfaces. K. Odashima, K. Koga, *Comprehensive Supramolecular Chemistry*, **1996**, *2*, 143.
50. Chemical Sensing Based on Membranes with Supramolecular Functions of Biomimetic and Biological Origin. K. Odashima, P. Buhlmann, M. Sugawara, K. Tohda, K. Koga, Y. Umezawa, *Advances in Supramolecular Chemistry*, **1997**, *4*, 211.
51. Asymmetric Synthesis Using Chiral Bases. K. Koga, K. Odashima, *Yakugaku Zasshi*, **1997**, *117*, 800.
52. Catalytic Asymmetric Reactions of Lithium Enolates. K. Koga, R. Shirai, *Materials Integration*, **2001**, *14*, 68.
53. Asymmetric Synthesis and Asymmetric Catalytic Reactions of Lithium Enolates. K. Koga, *Organometallic News*, **2003**, *3*, 100.
