The authors regret that the structure of mafaicheenamine B is incorrect. The structure of mafaicheenamine B is exactly the same as claulansine A which isolated by Lui *et al.*¹ from the same plant. However, the sign of specific rotation is different. The authors accordingly wish to withdraw the name “mafaicheenamine B” as well as its plausible biogenetic pathway from the literature.

The authors would like to apologize for any inconvenience caused.
